Description
The taxonomic group the species belongs to e.g. Higher Plants - Flowering Plants
The scientific name e.g. Adonis annua
The common name if there is one e.g. Pheasant's-eye
The level of the record in the hierarchy e.g. species, subspecies, species hybrid
A number that can be used to create a taxonomically sorted species list.
Qualifiers relating to the species record, usually describing abundance.
The date or time span during which the observation was made. (Record Date).
Year record was seen. (Record Year).
Name of recorder/observer.
Name of person who has verified the original record from observation/specimen
Ordnance Survey grid reference location of record
Estimate of the grid reference accuracy (metres) of the record. (Grid Reference Precision)
Indicates the position of the grid reference relative to the site. (Grid Reference Qualifier).
Easting location of the record.
Northing location of the record.
Name of place where record was seen.
Indication of nesting, home, breeding – based on terms in comments (Breeding Status).
Abbreviated list of legislation protecting the species in the planning system. For a full list see Appendix A.I. (Status: Legal).
Abbreviated list of additional (conservation) designations for the species. For a full list see Appendix A.I. (Status: Other).
London Invasive Species Initiative category abbreviation, if one applies to the species. See Appendix A.II for list of categories.
Name of Recorder database survey to which the record belongs.
Comments associated with the record.
Those records identified by GiGL’s Recorder Advisory Group as being confidential. See ‘Accessing data policy’ for further details. (Confidential).
Those records identified by GiGL’s Recorder Advisory Group as being sensitive. It includes all species of interest to planners (as in GiGL_DesignatedSpp_Point).
Statement of verification status (see Data Validation and verification policy)
Any comment associated with the verification status. (Verification Comment).
Recorder database Taxon Occurrence Key, (the unique identifier for this record).
The date this extract was created. (Version Date).
